1. INTRODUCTION

Ace nail cutter is a sanitary hand instrument that is used to cut finger and toe nails of human body. Nail cutter has additional gadgets for opening bottle and packages, cutting copper wires, removing under nail dirt and nail polisher.

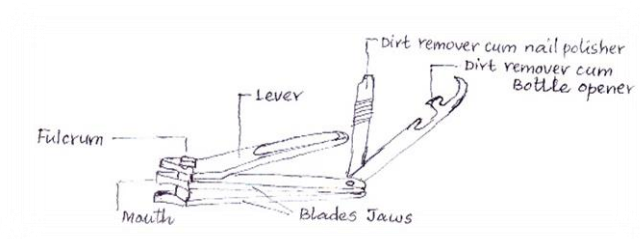

2. SAFETY CAUTIONS

- Ace nail cutter is used to cut nails only
- Use with utmost care as it may cut the skin and cause injury
- Do not cut the nail in a go as it may cause injury
- Do not allow children to use the nail cutter without supervision of an adult

- Do not use the nail cutter to cut hard objects as it may damage the mouth of the cutter
- After each use sanitize the nail cutter for preventing infection

3. TECHNICAL SPECIFICATIONS

This nail cutter consists of six central parts.

1. The lever
2. The pin
3. The blades
4. The fulcrum

5. Nail polisher cum dirt
remover

6. Dirt remover cum bottle
opener

1. The lever: lever is connected to the body by means of fulcrum. Lever can be turned 180 degrees to function as a lever above the jaws. When lever is pressed the jaws join together.

2. The pin: Pin holds the accessories within the jaws. Pin restricts the movement of accessories beyond a limit.

3. The Blades: The blades are made of two pieces of metal sheets with end curved to form a mouth. It has a long 'V' structure when we see it laterally. The two blades are joined by means of a pin.

4. The fulcrum: Fulcrum is located close to the mouth to hold the lever. Fulcrum facilitates the opening and closing of the jaws when lever is pressed.

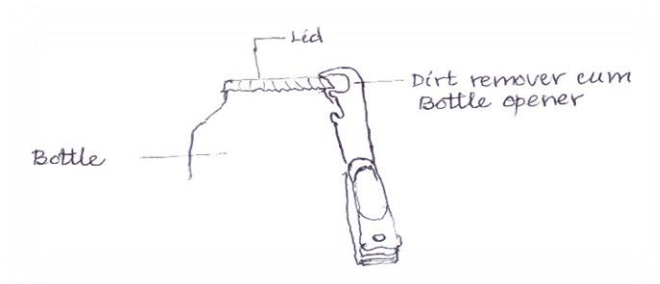

5. Nail polisher cum dirt remover: This accessory is used to polish the ends of the nails and to remove dirt under the

nail. A rough polisher is made on the side of the accessory for the purpose.

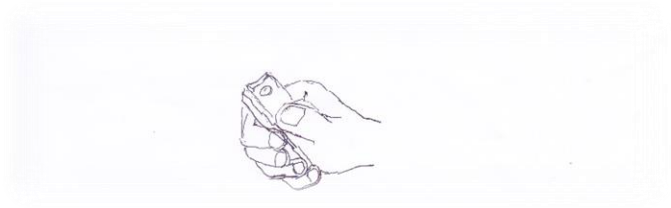

6. Dirt remover cum bottle opener: This is an extra gadget which is connected to the nail cutter by a pin. It is hidden between the two blades when not in use. The bottle opener has two jaws which can fit into

different types of bottle lids
with different thicknesses.

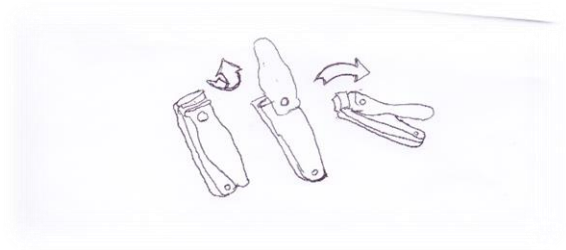

4.USAGE/ WORKING INSTRUCTIONS

- Hold nail cutter as a whole unit with fingers

- Turn the lever 180 degrees to apply force

- Place thumb or any finger of the choice over the lever

- Hold the mouth of the nail cutter close to nail to be cut
- Place the nail portion inside the mouth carefully and press the lever

- Collect the cut nails in a container

A detailed illustration of a person's hands using a nail clipper to trim a thumb nail. The clipper is a standard manual design with two sharp blades. The hands are rendered in a realistic style with visible skin texture and fingernails. The background is a soft, out-of-focus light color.

5.HAZARD WARNING

- The use of nail cutter be done under super vision
- The rusted instrument may cause diseases like Tetanus etc.
- The whole unit has gadgets which are sharp and can cause injury

6.WARRANTY

- The nail cutter holds 1 year warranty from the date of purchase
- The manufacturer is not responsible for warranty if the right procedure for usage is not followed
